EUROSTATISTIK I 1982

Fra januar 1982 vil » Eurostatistik « ved udgangen af hver måned blive offentliggjort i en enkelt udgave affattet på tysk, engelsk og fransk. Tillæg indeholdende tabelhoveder og andre forklarende noter oversat til dansk, græsk, italiensk og nederlandsk vil blive sendt til læserne i de pågældende lande i løbet af foråret. » Eurostatistik « vil fra og med januar indeholde tallene for Grækenland, og totaler for EUR 10 vil blive inkluderet i løbet af 1982. Opstillingen af oplysningerne vil blive ændret lidt, og forsiden vil få en mere tiltalende udformning i lighed med andre hovedpublikationer fra Eurostat som » Eurostat-Revue « og » Statistiske basisoplysninger «.

EN

EUROSTATISTICS IN 1982

Starting from January 1982, 'Eurostatistics' will be published at the end of each month in a single version in German, English and French. Supplements containing the titles and other explanatory texts, translated into Danish, Greek, Italian and Dutch, will be sent to readers in the appropriate countries in spring. Figures for Greece will appear in 'Eurostatistics' from January onwards. Totals for EUR 10 will be introduced in the course of 1982. The presentation will be slightly modified and the front cover made more attractive, bringing it into line with other key Eurostat publications, such as 'Eurostat Review' and 'Basic Statistics'.

IT

EUROSTATISTICHE NEL 1982

A partire dal gennaio 1982, le « Eurostatistiche » verranno pubblicate alla fine di ogni mese in un unico fascicolo in lingua tedesca, inglese e francese. In primavera i lettori dei rispettivi paesi riceveranno supplementi contenenti i titoli e gli altri testi esplicativi tradotti in danese, greco, italiano e olandese. Sempre a partire dal mese di gennaio le « Eurostatistiche » conterranno anche i dati relativi alla Grecia, mentre i totali per EUR 10 verranno introdotti nel corso del 1982. La pubblicazione si presenterà in versione lievemente modificata (tra l'altro la copertina sarà resa più piacevole), simile a quella delle altre pubblicazioni-chiave dell'Eurostat : « Rassegnà Eurostat » e « Statistiche generali della Comunità ».

1. Arbejdsløshed

Ved udgangen af oktober måned 1981 var der i de ni medlemsstater 9,7 Mio registrerede arbejdsløse svarende til en arbejdsløshedsprocent på 8,8% i forhold til den civile erhvervsaktive befolkning.

Det allerede ved udgangen af september måned registrerede antal arbejdsløse er øget med mere end 200 000. Den vedholdende stigning på over 2% pr. måned i sæsonkorrigerede tal siden foråret 1980 gør det muligt at forudsige, at tallet 10 Mio registrerede arbejdsløse inden for Det europæiske Fællesskab vil nås inden årets udgang.

Under hensyntagen til sæsonbetingede forhold synes forværringen på arbejdsmarkedet for øjeblikket at være mest udtalt i Forbundsrepublikken Tyskland, Luxembourg, Nederlandene og Danmark, mens situationen i Italien, Irland og Belgien for tiden mere eller har stabiliseret sig på et niveau, der dog er temmeligt højt.

Over et år har den samlede stigning i arbejdsløsheden for Fællesskabet under ét ligget på gennemsnitlig +32% over for +54% i Forbundsrepublikken Tyskland og Nederlandene, +47% i Luxembourg og +45% i Det forenede Kongerige.

Antallet af registrerede jobtilbud hos de nationale arbejdsformidlingskontorer er stadig yderst lavt. For hele Fællesskabet uden Italien når det samlede antal end ikke op på 400 000 jobtilbud (over for 7,6 Mio arbejdsløse).

2. Forbrugerpriserne i oktober 1981

For første gang i et halvt år steg forbrugerprisindekset i EF med mere end 1% på en måned (1,1% fra september til oktober). Priserne stiger meget stærkt i Grækenland, hvor det meget høje tal 4,3% for september er blevet fulgt af yderligere en betydelig stigning på 2,6% i oktober måned. En betydelig stigning ses ligeledes i Italien, hvor priserne stiger med 2,0%. Mærkbare stigninger er ligeledes registreret i Frankrig (1,2%), Det forenede Kongerige (0,9%) og Nederlandene (0,9%), mens stigningen i Forbundsrepublikken Tyskland, Belgien, Luxembourg og Danmark forbliver relativt moderat (0,3% til 0,5%). For EF under ét udgjorde stigningstakten over 12 måneder 12,8%. I de enkelte lande er stigningstakten stadig meget forskellige: de forbliver meget høje i Grækenland (ca. 25%), Irland (ca. 20%) og Italien (ca. 19%). De er også mærkbare i Frankrig (ca. 14%), Det forenede Kongerige og Danmark (alle ca. 12%), mens Forbundsrepublikken Tyskland og Benelux-landene udviser mere moderate tal (mellem 6 og 9%). For nogle ikke-medlemsstater er tallene: Spanien ca. 14%, Portugal ca. 25%, USA ca. 11% og Japan ca. 4%.

3. Indekset over industriproduktionen — stabil produktion i løbet af tredje kvartal

Det foreløbige indeks over industriproduktionen i Fællesskabet for september måned 1981, som bygger på tal fra fem medlemsstater (D, FR, I, NL og UK), er opgjort til 114,7 (1975=100). Dette svarer til et fald på 0,6% i forhold til den tilsvarende måned i 1980, hvor man allerede havde konstateret de største fald i industriproduktionen. For hele tredje kvartal i 1981 udgør nedgangen 1,7% i forhold til samme kvartal i det foregående år.

Efter korrektion for sæsonudsving er indekset for september opgjort til 112,6. Selv om dette tal er svagt stigende i forhold til tallet for august måned (+0,3%), er de korrigerede indekser for de to seneste måneder de laveste, som er registreret siden januar måned. Efter korrektion for sæsonudsving har industriproduktionen i tredje kvartal næsten holdt sig på niveau med produktionen i andet kvartal (-0,2%), selv om den samlede virkning af den siden årets begyndelse registrerede nedgang (-0,3% i første kvartal, -0,3% i andet kvartal og nu -0,2% i tredje kvartal) svarer til en nedgang i størrelsesordenen 1% i forhold til niveauet ved udgangen af 1980.

Betragter man udviklingen på nationalt plan i de fire store lande, ses hovedårsagerne til det faldende indeks for Fællesskabet i løbet af de seneste to måneder tydeligt: det korrigerede indeks for industriproduktionen i Italien viste en nedgang på næsten 12 point i august, man nåede så atter op på niveauet for de foregående måneder i september, mens den tyske produktion i samme måned faldt mærkbart (næsten 3 point).

For de tre store produktionsgrupper konstateres siden begyndelsen af tredje kvartal 1981 en mærkbar forbedring i væksttendenserne inden for mellemproduktindustrien (fra -0,1% i juli til +0,8% i september) og forbrugsgodeindustrien (fra -0,7% i juli til 0,2% i september), mens tendensen inden for investeringsgodeindustrien er klart nedadgående (-1,2% i september).

4. Stål

I oktober 1981 nåede produktionen af råstål (sæsonkorrigeret) i EF (uden Grækenland) næsten niveauet for den foregående måned. Med 10,9 Mio tons lå den 4,8% over den relativt beskedne produktion i oktober måned 1980.

Produktionen af færdigprodukter er atter steget mærkbart i september 1981 efter tilbagegangen i den foregående måned. Med 9,1 Mio tons (uden produktionen fra de græske værker) lå den 9,3% over det sammenlignelige niveau for det foregående år.

Efter en forbigående tilbagegang er ordretilgangen for almindeligt stål øget betydeligt i september 1981 p.g.a. øget efterspørgsel på de nationale markeder. Med ca. 8 Mio tons lå denne 16% over den tilsvarende mængde det foregående år.

5. Energi: Udviklingen i bestræbelserne for energibesparelser i første kvartal 1981

Tallene for første kvartal af 1981 viser et tiltagende fald i det globale energiforbrug. Faldet i Fællesskabets bruttoforbrug af energi, som har ligget på ca. 4,5% i 1980 og ca. 5,4% i første kvartal af 1981, nåede 6,3% i løbet af første halvår af 1981, hvilket i absolutte tal svarer til et fald på 31 Mio t olieækvivalenter. Dette fald er meget forskelligt fordelt i forhold til kilder og lande. Med hensyn til kilderne registrerer man et meget betydeligt fald for olie (-12%), moderat for naturgas (-5%) og svagt for fast brændsel (-2%), mens forøgelsen for atomkrafts vedkommende har været ca. 26%. For landenes vedkommende finder man mellem yderpunkterne på -0,9% for Irland og -18,5% for Luxembourg på den ene side Forbundsrepublikken Tyskland, Nederlandene, Belgien, Det forenede Kongerige og Danmark med fald, som ligger over Fællesskabsgennemsnittet, og på den anden side Frankrig, Italien og Grækenland med mindre betydelige fald.

Strukturmæssigt har der fundet temmelig betydelige ændringer sted i løbet af første halvår af 1981. Da den faldende efterspørgsel især har ramt olieprodukter, er oliens andel i energiforbruget faldet fra ca. 52 til ca. 49 %, og andelen af fast brændsel og naturgas er tilsvarende øget svagt, til trods for et fald i forbruget i absolutte tal.

Forøgelsen af primærenergiproduktionen, som skyldes udviklingen af atomenergi og en intensiveret udvinding af råolie i Nordsøen, forbundet med den ringe efterspørgsel efter energi har muliggjort en betydelig formindskelse i afhængigheden af energi udefra (48% mod 54% i 1980 og 64% i 1973). Især afhængigheden af olie har nået et aldrig tidligere set lavt niveau (7 point for Fællesskabet) takket været en reduktion i nettoimporten af olie på 20%, en betydelig lagerreduktion for olieprodukter og en vækst på i produktionen af råolie.

6. Samhandelen inden for Fællesskabet

Importen inden for Fællesskabet mellem medlemsstaterne uden BLØU og Grækenland er i september måned 1981 øget med 17% i forhold til september 1980. Det bemærkes, at stigninger over gennemsnittet har fundet sted i Irland, Det forenede Kongerige, Danmark og Italien. Nederlandene har haft den mest beskedne stigning (+9%). En sammenligning mellem de kumulerede tal for de første 9 måneder i 1981 og de tilsvarende fra samme periode i 1980 viser, at den største vækst er registreret i Irland (+20%), mens Nederlandene har registreret den mest beskedne (+2%). Gennemsnittet ligger på 5%. I løbet af samme periode har Nederlandene forøget deres eksport med 10% og forbedret deres handelsbalance over for de andre medlemsstater betydeligt.

7. Fællesskabets samhandel med tredjelande

Medlemsstaternes eksport til tredjelande (uden Grækenland og BLØU) er i september måned 1981 forøget med 30% i forhold til samme måned i det foregående år. Der er noteret stigninger over gennemsnittet for Irland og Italien. Disse to lande samt Frankrig har ligeledes haft en stigning i importen over gennemsnittet (+21%). For de første 9 måneder af 1981 har væksten i eksporten i forhold til samme periode i 1980 ligget på +37% i Irland, 36% i Italien og 29% i Danmark. Til gengæld er importen steget hurtigst i Italien (+24%) og Irland (+20%), mens de laveste stigninger er registreret i Forbundsrepublikken Tyskland (+3%) og Danmark (+11%). Det bør imidlertid erindres, at tallene for denne periode ikke foreligger for BLØU, Det forenede Kongerige og Grækenland. For de øvrige landes vedkommende er underskuddet på handelsbalancen over for tredjelande i løbet af disse 9 måneder faldet med 6 Mrd ECU til 23 Mrd ECU i forhold til samme periode i 1980.

8. Penge og finanser : Faldende rentefod i USA

Med nedsættelsen af diskontoen fra 14 til 13% i begyndelsen af november, det første fald siden juli 1980, har det amerikanske Federal Reserve Board givet det første stød til en faldende tendens i rentefoden, som har været ved siden da. Denne kurs inden for pengepolitikken blev styrket 2 uger senere ved fjernelsen af de 2% overrente. Disse 2% har bankerne, som hyppigt og i vid udstrækning benyttede sig af diskontoen, måttet udrede. Som følge heraf er rentefoden begyndt at falde på de private markeder og lånemarkederne. Bankernes primærrate er således blevet nedsat med fra 1 til 1,5%.

1. Unemployment

The number of persons registered as unemployed in the Community of Nine at the end of October 1981 was 9.7 million, which corresponds to an unemployment rate of 8.8% in relation to the civilian working population.

More than 200 000 persons were added to the total number of unemployed registered at the end of September. The continuing growth in unemployment since the spring of 1980, at a rate in excess of 2% per month in seasonally adjusted terms, suggests that the figure of 10 million registered unemployed in the Community will be reached before the end of the year.

When seasonal factors are taken into account, the deterioration of the labour market situation appears particularly marked in the F.R. of Germany, Luxembourg, the Netherlands and Denmark, while in Italy, Ireland and Belgium the position has stabilized for the moment, albeit at a fairly high level.

Over a twelve-month period, the total increase in unemployment was +32% for the Community as a whole, but it amounted to +54% in the F.R. of Germany and in the Netherlands, +47% in Luxembourg and +45% in the United Kingdom.

Vacancies notified at public employment offices remain at an extremely low level. For the entire Community, excluding Italy, the total of vacancies notified did not even reach 400 000 (as against 7.6 million unemployed).

2. Consumer prices in October 1981

For the first time in six months the consumer price index in the EC rose by more than 1% in a month, increasing by 1.1% from September to October. Prices rose sharply in Greece, where the very high figure of 4.3% in September was followed by another significant increase of 2.6% in October. A major increase was also reported from Italy, where prices went up by 2.0%. Significant increases were recorded too in France (1.2%), the United Kingdom (0.9%) and the Netherlands (0.9%), whereas in Germany (FR), Belgium, Luxembourg and Denmark price growth was fairly slow (0.3 to 0.5%). For the EC as a whole the rate of increase over a twelve-month period was 12.8%. For the individual countries the rates are still very different; they remain very high in Greece ($\pm 25\%$), Ireland ($\pm 20\%$) and Italy ($\pm 19\%$). They are also appreciable in France ($\pm 14\%$), the United Kingdom and Denmark (both $\pm 12\%$), whereas Germany (FR) and the Benelux countries show more moderate rates (between 6 and 9%). The corresponding figures for some non-Community countries are as follows: Spain $\pm 14\%$, Portugal $\pm 25\%$, U.S.A. $\pm 11\%$ and Japan $\pm 4\%$.

3. Index of industrial production — stable production in the third quarter

The provisional index of industrial production in the Community for September 1981, which is based on figures provided by five countries (D, F, I, NL, UK), stood at 114.7 (1975=100). This means that it has fallen by 0.6% against the figure for the same month of 1980, which followed a period of severe falloff in industrial production. The overall fall for the third quarter of 1981 amounts to 1.7% with respect to the same quarter of the previous year.

The seasonally adjusted September index is 112.6. Although this represents a slight rise in comparison with the August figure (+0.3%), the seasonally adjusted indices for the last two months are the lowest recorded since January. After seasonal adjustment, industrial production in the third quarter has remained more or less at the same level as in the second quarter (−0.2%), even though the cumulative effect of the falls observed since the beginning of the year (−0.3% in the first quarter, −0.3% in the second and now −0.2% in the third) means that there has been a drop for approximately 1% compared with the figure for the end of 1980.

The main causes for the downturn in the Community index over the past two months emerge clearly from an examination of national trends in the four major countries: the seasonally adjusted index for Italy showed a fall of almost 12% in August, but recovered in September to reach the level for preceding months, whereas in September it was German production which exhibited a marked decline (almost 3%).

With regard to the three main groups of industrial products, a clear improvement of the trends in both intermediate products (+0.8% in September against −0.1% in July) and consumer goods (from −0.7% in July to 0.2% in September) has been apparent since the beginning of the third quarter of 1981, whereas the trend in capital goods has been clearly downward (−1.2% in September).

4. Steel

In October 1981 crude steel production (seasonally adjusted) in the Community (excluding Greece) was much the same as in the previous month. At 10.9 Mio t it exceeded the relatively low figure of October 1980 by some 4.8%. Production of finished products again increased substantially in September 1981 after dropping the month before. At 9.1 Mio t (excluding Greece) it was 9.3% greater than the comparable level of last year. After a temporary decline, new orders for ordinary steels increased noticeably in September 1981, owing to increased demand on the home markets. At about 8 Mio t, total new orders exceeded last year's comparable level by 16%.

5. Energy: trends in the energy sector during the first half of 1981

The downward trend in overall energy consumption gathered pace during the first half of 1981. The fall in gross inland consumption of energy in the Community, which was about 4.5% in 1980 and 5.4% in the first quarter of 1981, reached 6.3% during the first six months of 1981, which amounts to a reduction in absolute terms of 31 million tonnes oil equivalent. This reduction was very unevenly distributed among the sources and countries. With regard to sources, there was a substantial decrease in oil consumption (−12%), a moderate decrease for natural gas (−5%) and a slight one for solid fuels (−2%), whereas there was an increase of about 26% for nuclear energy. With regard to the countries concerned, the decline in consumption ranged from −0.9% (Ireland) to −18.5% (Luxembourg), with reductions in excess of the Community average in the FR of Germany, the Netherlands, Belgium, the UK and Denmark, and smaller reductions in France, Italy and Greece.

Fairly major structural changes occurred during the first half of 1981. Since the fall in demand mainly affected oil products, the proportion of energy consumption accounted for by oil fell from 52 to about 49%, with corresponding slight increases in the percentage shares of solid fuels and natural gas, despite a fall in actual consumption.

The increase in primary production due to the development of nuclear energy and increased crude oil extraction in the North Sea, combined with the decline in demand for energy, led to a substantial decrease in dependence on outside energy sources (48% as against 54% in 1980 and 64% in 1973). In particular, dependence on oil from outside the Community fell to hitherto unknown levels (7 percentage points for the Community), thanks to a 20% reduction in net oil imports, substantial use of oil stocks and an 11% rise in crude oil production.

6. Intra-Community trade

In September 1981, imports from other Community countries to all the Member States except the BLEU and Greece were 17% higher than in September 1980. Increases were higher than average in Ireland, the United Kingdom, Denmark and Italy. The Netherlands had the lowest rise in imports (+9%). A comparison of the cumulative data for the first nine months of 1981 with those for the same period in 1980 indicates that imports to Ireland increased most (+20%) and those to the Netherlands least (+2%). The average is 5%. In the same period, the Netherlands increased its exports by 10% and substantially improved its trade balance with the other Community countries.

7. Extra-Community trade

In September 1981, exports from the Member States (other than Greece and the BLEU) to countries outside the Community were 30% higher than in the same month of 1980. Increases were higher than average in Ireland and Italy. Imports to these two countries, as well as to France, also showed an increase in excess of the average (+21%). Exports in the first nine months of 1981 exceeded those for the same period in 1980 by 37% for Ireland, 36% for Italy and 29% for Denmark. Imports, on the other hand, increased most rapidly in Italy (+24%) and Ireland (+20%), while the rise was least pronounced in Germany (+3%) and Denmark (+11%). It should be noted, however, that the data for this period are not available for the BLEU, the United Kingdom or Greece. The extra-Community trade deficit of the other Member States over these nine months fell by 6 000 million ECU as compared with the same period in 1980 to 23 000 million ECU.

8. Finance: drop in US interest rates

By reducing the official discount rate from 14 to 13% at the beginning of November — the first drop in the rate since July 1980 — the American Federal Reserve Board initiated a downward trend in interest rates which has since continued. This tendency in monetary policy was accentuated two weeks later with the abolition of the 2% premium imposed on banks which made frequent and substantial use of the official discount rate. As a result, interest rates on the private and credit markets began to fall and the prime lending rates of the banks were cut by between 1 and 1.5%.

1. Disoccupazione

Alla fine del mese di ottobre del 1981 i disoccupati iscritti nelle liste di collocamento della Comunità (Nove paesi) erano 9,7 milioni, pari all'8,8% della popolazione attiva civile. Più di 200 000 persone si sono così aggiunte ai disoccupati già iscritti a fine settembre. Se la disoccupazione continuerà a salire al ritmo seguito dalle primavere del 1980 (più del 2% al mese, in cifre destagionalizzate), si arriverà a fine anno alla cifra di 10 milioni di disoccupati.

Un'analisi dei dati corretti delle variazioni stagionali mostra un aggravamento particolarmente rapido della situazione del mercato del lavoro nella Repubblica federale di Germania, nel Lussemburgo, nei Paesi Bassi e in Danimarca, mentre in Italia, Irlanda e Belgio si osserva per ora una situazione abbastanza stabile, corrispondente tuttavia ad un livello di disoccupazione piuttosto elevato.

Nell'arco di un anno l'aumento totale della disoccupazione è stato, in media, del 32% per l'insieme della Comunità, ma del 54% nella RF di Germania e nei Paesi Bassi, del 47% nel Lussemburgo e del 45% nel Regno Unito.

Le offerte di lavoro registrate dagli uffici nazionali di collocamento restano ad un livello estremamente basso. Per l'insieme della Comunità, esclusa l'Italia, non si raggiungono le 400 000 offerte di lavoro, a fronte di 7,6 milioni di disoccupati.

2. I prezzi al consumo nell'ottobre del 1981

Per la prima volta da sei mesi i prezzi al consumo nella CE sono saliti di più dell'1% in un mese: l'aumento tra settembre e ottobre è infatti dell'1,1%. L'aumento è stato molto forte in Grecia: alla cifra elevatissima del mese di settembre 4,3%) è seguito un altro aumento significativo del 2,6 in ottobre. Un aumento decisamente elevato si osserva anche in Italia, dove prezzi sono saliti ben del 2,0%.

Considerevoli anche gli aumenti osservati in Francia (1,2%), nel Regno Unito (0,9%) e nei Paesi Bassi (0,9%), moderati invece quelli della RF di Germania, del Belgio, del Lussemburgo e della Danimarca (tra lo 0,3 e lo 0,5%).

Per la CE nel suo complesso il tasso d'aumento sull'arco di dodici mesi risulta così del 12,8%.

I tassi annuali sono però sempre molto diversi da un paese all'altro: restano molto elevati in Grecia ($\pm 25\%$), Irlanda ($\pm 20\%$) e Italia ($\pm 19\%$), considerevoli in Francia ($\pm 14\%$), nel Regno Unito e in Danimarca ($\pm 12\%$ per entrambi) e più moderati per la RF di Germania e i paesi del Benelux (tra il 6 e il 9%). Le cifre corrispondenti per alcuni paesi non della Comunità sono: Spagna $\pm 14\%$, Portogallo $\pm 25\%$, U.S.A. $\pm 11\%$ e Giappone $\pm 4\%$.

3. Indice della produzione industriale: produzione stabile nel terzo trimestre

L'indice provvisorio della produzione industriale nelle Comunità per il mese di settembre del 1981, basato sulle cifre fornite da 5 paesi (D, F, I, NL, UK), risulta di 114,7 (1975=100), accusando una perdita dello 0,6% rispetto a settembre del 1980, un momento in cui la produzione industriale già aveva accusato le più forti flessioni. Per tutto il terzo trimestre del 1981, la flessione sul trimestre corrispondente dello scorso anno è dell'11,7%.

Se si elimina l'incidenza delle oscillazioni stagionali, l'indice di settembre risulta di 112,6: sebbene questa cifra sia in lieve aumento su quella di agosto (+0,3%), va osservato che gli indici destagionalizzati degli ultimi due mesi sono i più bassi che si registrino da gennaio. Su base destagionalizzata la produzione industriale del terzo trimestre si è mantenuta all'incirca al livello del secondo (-0,2%): tuttavia, l'effetto cumulativo delle flessioni registrate dall'inizio dell'anno (-0,3% nel primo trimestre, -0,3% nel secondo e -0,2% nel terzo) comporta una perdita produttiva dell'ordine dell'1% sul livello della fine 1980.

L'esame dell'evoluzione nazionale nei 4 maggiori paesi permette di evidenziare nettamente le cause principali della flessione dell'indice comunitario negli ultimi due mesi: l'indice destagionalizzato della produzione in Italia ha accusato in agosto una flessione di quasi 12 punti, recuperando però in settembre il livello dei mesi precedenti; in settembre è invece la produzione industriale tedesca a segnare un netto regresso (di quasi 3 punti).

L'analisi della congiuntura per i tre grandi gruppi di prodotti industriali permette di osservare, dall'inizio del terzo trimestre 1981, un sensibile miglioramento delle tendenze per i beni intermedi (da -0,1% in luglio a +0,8% in settembre) e i beni di consumo (da -0,7% in luglio a +0,2% in settembre), mentre la tendenza dei beni d'investimento si è orientata decisamente al ribasso (-1,2% in settembre).

4. Siderurgia

Nell'ottobre del 1981 la produzione (destagionalizzata) di acciaio grezzo nella Comunità (Grecia esclusa) ha quasi raggiunto il livello del mese precedente: con un volume di 10,9 milioni di tonnellate essa supera del 4,8% circa la cifra relativamente bassa di ottobre 1980. La produzione di prodotti finiti nel settembre 1981 ha segnato di nuovo una notevole ripresa, dopo la caduta del mese precedente e, con 9,1 milioni di tonnellate (Grecia esclusa), risulta superiore del 9,3% alla cifra corrispondente dell'anno scorso. Dopo una flessione temporanea, anche i nuovi ordinativi di acciai comuni sono aumentati decisamente nel mese di settembre, grazie all'accresciuta domanda sui mercati nazionali: con 8 milioni di tonnellate il totale dei nuovi ordinativi supera del 16% il livello dello scorso anno.

5. Energia: evoluzione dell'economica energetica nel primo semestre del 1981

I risultati del primo semestre del 1981 indicano un acceleramento della flessione del consumo energetico globale. La diminuzione del consumo interno lordo di energia della Comunità, che era stata dell'ordine del 4,5% nel 1980 e del 5,4% nel primo trimestre del 1981, ha raggiunto sull'arco del primo semestre del 1981 il 6,3%, corrispondente in termini assoluti ad una riduzione di 31 milioni di tonnellate di equivalente petrolio. Questa diminuzione è distribuita in maniera molto diversa a seconda delle fonti di energia e dei paesi. Per fonti, si osserva un regresso molto forte per il petrolio (-12%), medio per il gas naturale (-5%) e moderato per i combustibili solidi (-2%), a fronte di un aumento del 26% circa per l'energia nucleare. Per paesi, tra gli estremi dell'Irlanda (-0,9%) e del Lussemburgo (-18,5%) si trovano da un lato la RF di Germania, i Paesi Bassi, il Belgio, il Regno Unito e la Danimarca, con diminuzioni superiori alla media comunitaria, e dall'altro la Francia, l'Italia e la Grecia, con diminuzioni meno rilevanti.

Sul piano strutturale, nel primo semestre del 1981 sono intervenute modifiche assai importanti. Poiché la riduzione della domanda ha interessato essenzialmente i prodotti petroliferi, la quota del petrolio nel consumo di energia è scesa dal 52% al 49% circa; nel contempo sono lievemente aumentate le quote dei combustibili solidi e del gas naturale, malgrado una diminuzione del loro consumo in termini assoluti.

L'aumento della produzione da fonti primarie — da attribuire allo sviluppo dell'energia nucleare e all'intensificata estrazione di petrolio greggio nel Mare del Nord — e la concomitante debolezza della domanda di energia hanno permesso di ridurre energicamente la dipendenza energetica dai paesi extracomunitari (pari attualmente al 48%, contro il 54% nel 1980 e il 64% nel 1973). In particolare, la dipendenza dalle fonti petrolifere è diminuita a ritmi mai conosciuti prima (sette punti per la Comunità), grazie ad una contrazione del 20% delle importazioni nette di petrolio, a una forte riduzione delle scorte di prodotti petroliferi e ad un aumento dell'11% della produzione di petrolio greggio.

6. Scambi intracomunitari

Nel mese di settembre del 1981 gli scambi intracomunitari, valutati sulla base delle importazioni, (per tutti i paesi membri, esclusi l'UEBL e la Grecia, i cui dati non sono ancora disponibili) sono aumentati del 17% rispetto a settembre del 1980. Aumenti superiori alla media si osservano in Irlanda, nel Regno Unito, in Danimarca e in Italia. I Paesi Bassi hanno registrato invece l'aumento più modesto (+9%). Da un raffronto dei dati cumulati per i primi nove mesi del 1981 con quelli dello stesso periodo del 1980, emerge che l'incremento maggiore è stato registrato dall'Irlanda (+20%), quello più modesto dai Paesi Bassi (+2%); la media si situa sul 5%. Nello stesso periodo i Paesi Bassi hanno aumentato le loro esportazioni del 10%, migliorando sensibilmente la loro bilancia commerciale negli scambi con gli altri paesi membri.

7. Scambi con i paesi al di fuori della Comunità

Nel settembre del 1981 le esportazioni dei paesi membri (escluse la Grecia e l'UEBL) verso i paesi al di fuori della Comunità risultano aumentate del 30% rispetto a settembre dello scorso anno. Aumenti superiori alla media si osservano per l'Irlanda e l'Italia. Questi due paesi, insieme con la Francia, registrano anche un aumento superiore alla media delle loro importazioni (+21%). Per i primi nove mesi del 1981, l'aumento delle esportazioni rispetto al corrispondente periodo del 1980 è stato del 37% in Irlanda, del 36% in Italia e del 29% in Danimarca. Per le importazioni, gli aumenti maggiori hanno interessato l'Italia (+24%) e l'Irlanda (+20%), quelli più moderati la Germania (+3%) e la Danimarca (+11%). Va tuttavia ricordato che mancano per questo periodo i dati per l'UEBL, il Regno Unito e la Grecia. Per gli altri paesi, nel periodo di nove mesi in esame il disavanzo commerciale con i paesi terzi è diminuito, rispetto allo stesso periodo del 1980 di 6 miliardi di ECU, per ammontare globalmente alla cifra di 23 miliardi di ECU.

8. Finanze : flessione dei tassi d'interesse negli Stati Uniti

Con la riduzione di un punto del tasso ufficiale di sconto (dal 14 al 13%) applicata all'inizio di novembre — la prima che si osservi dal luglio 1980 — l'American Federal Reserve Board ha dato l'avvio ad un'inversione di tendenza nei tassi d'interesse. Il nuovo corso della politica monetaria è stato confermato due settimane più tardi dall'abolizione della maggiorazione del 2% del tasso di sconto, che colpiva le banche che facessero un ricorso frequente e massiccio allo sconto ufficiale. La diminuzione del tasso ufficiale di sconto ha comportato una flessione nei tassi d'interesse applicati sul mercato creditizio privato : i tassi primari applicati dalle banche sono così scesi di un punto o di un punto e mezzo.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og måneds-tal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelser, definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.
